Hecht's Greater Stores.

STOCK MARKET STRONG ON LARGE TRANSACTIONS

NORTHERN PACIFIC A FEATURE

Advances Over a Point Above Yesterday's Price in the Early Benlings.

New York, Jan, 12.-The stock market opened strong on fairly large transactions. The feature of the dealings was Northern Pacific, which on heavy trading advanced over a point above yesterday's final prices. The buying was attended by renewed te-perts of an amicable understanding be-tween the management and important competitive interests.

Other Strong features included Illinois Central, the grangers and Watash. After a slight advance at the opening. Sugar developed a reactionary tendency and sold off over a point from the high figure. Jeroff over a point from the high figure. Jer-sey Central became conspicuous later by an extreme advance of 4 points to 103 on the belief that that company will gain in-fluence through a readjustment of the anthracite coal trade. Heavy buying of Chicago Gas after the first fitteen minutes curried the price up hearly 2 per cent. This advance was attributed to the new

the list. It passed the high-water mark for the last twenty years, if not for all time. In the old days, when Pennsylvania was a haif share, it sold at 65 and paid 10 per cent. Today it sold at 131 and looked. good for a further advance. This price for a 5 per cent stock is an indication, if one is inclined to look at the thing in this way. of the possibilities for other good stocks if the bull movement really gets under way this spring.

The grangers were active and estab lished new high marks. It is an everyday matter now for this to occur. Burlington at soon had gone up a point and more and seemed on its way to 130. St. Paul and Rock Island were advancing, though not so rapidly. It is supposed that information of the earnings of Burlington has gotten on Burlington has gotten out and that the news is excellent.

The coal stocks are strong and Wall Street seems to believe that the much talked of deal will be officially announced before the end of the month. Many con-servative people, however, are less inclined to predict higher prices for these securities than for many others.

anthractic coal trade. Heavy buying of Chicago Gas after the first fifteen minutes curried the price up nearly 2 per cent. This advance was attributed to the new pool said to have been recently formed in the stock. Commission houses were the buying.

There was the prediction is some quarters that a more was to come in Brooklyn Eapid Transit today, but up to a late hour it had not materialized. There was a large black of stock bought by one house yesterday and the tip probably arose through this transaction.

FOR THE USE OF FARMERS. Agricultural Department Bulletin or

Polsonous Plants. In order to supply the great demand by lation to possentus plants, the United States Department of Agriculture will seen issue Farmers' Bulletin No. 86, en-

titled, "Thirty Poisonous Plants of the United States." It was prepared by V. K. Chestnut, assistant botanist. The Division of Botany has during the est three years been collecting general nd specific information concerning pois er of cases of poisoning which have been neer. He was born in South Mill, N. J. eported to the division. By communi-ating with the physician who had charge

of each case, accurate and full data were This bulletin contains descriptions of thirty, and illustrations of twenty-four, or r. localities where found, and symptom of poisoning are also briefly described The bulletin says that owing to a lack of statistics it is impossible to form even an approximate estimate of the damage done by poisonous plants. A number of children are killed annually by the various species of water hemlock. Many cattle are also killed.

All poisonous plants are not equally injurious to all persons nor to all forms of life. The poison ivy, for instance, acts upon the skins of the majority of persons, but with varying intensity. Many people are probably wholly immune, and it has no apparent external effect upon animals, There is a large number of poisonous lants which are comparatively little nown. This bulletin considers those only

which are well known to be poisonous to dangerous degree. The bulletin is for free distribution, and may be obtained of members of Congress or by applying to the United States DepartAUCTION SALE.

Indian Tribe. The Department of the Interior for some time has been negotiating with the Kle-Southwestern part of Oregon, for a portion of their territory, that it might be thrown open to the settlers of the West. The Intian Commissioner has received a munication from the agent entrusted with the negotiations which leads him to believe that the deal is drawing to a close.

NEW RIVER GAUGE.

Installed on the Washington Gas Company Dock.

A new river gauge has been installed on the dock of the Washington Gas Co., at Twenty-seventh and G Streets northwest. The zero of this gauge is set at mean low tide of the Potomac River, corresponding to the zeros of the other gauges of the District. The reference bench mark is a spike a few inches south of the head of the gauge

and the top of this spike is 2.0% feet above mean low tide or 7.220 feet above mean sea level.

OBITUARY.

Dr. C. C. P. Clark.

Oswego, N. Y., Jan. 12.-Dr. C. C. P. Clark, seventy-five years old, one of the oldest citizens of Oswego, N. Y., a man of wide learning, and author of the Clark election bill, which twice passed State legislature, died yesterday. Clark was born in Middlebury, Vt. 1822. His parents were pioneers of the Green Mountain State. He was graduated Green Mountain State. He was graduated from Middlebury College in 1843, and from the College of Physicians and Surgeons in New York in 1847. He studied for some time in Paris. He was collector of customs here under President Grant, and wrote "The Commonwealth Reconstructed" and other books.

Joseph Pearson Gill. Joseph Pearson Gill died at his home in New York Monday. He was a civil engi-

and was eighty years old. He through the Mexican war. His first important engineering work was in connec-tion with the building of a railroad from Trenton to Belvidere, N. J. Later he built gas works in many cities Captain Mathew Jackson. Capt, Mathew Jackson, president of the Ross Iron Works, in Brooklyn, died at his

residence in that city yesterday, in his forty-ninth year of pneumonia. Capt Jackson served as chief officer on the Umbria and Lucania. He had charge of a boat which carried the hawser from the Umbria when she was disabled at sen six years ago, to a rescuing steamship.

Colonel George P. Windsor. Col. George P. Windsor died yest-rday at his home in New York of Bright's disease. He was born in Watertown, Conn. in 1818. He was well acquainted with Abraham Lincoln and was frequently con-sulted by him about matters pertaining to the quartermaster's department during the war. He came to live in New York in 1823 and was always active in politicers have come to look forward to them, knowing from past experiences the wonderful opportunities for saving they offer.
